— CLOUD SECURITY —

"MOST SURVEYS SHOW SECURITY CONCERNS AS #1 INHIBITOR OF CLOUD ADOPTION"

Security is THE biggest inhibitor of Cloud adoption. Most CIOs/CISOs are skeptical (and rightfully so) about putting their organizations' data on the Cloud.

The Cloud is an attractive target for hackers as any breach could have a big pay off due to a large number of organizations getting compromised at the same time.

Forrester has predicted that in 2015, Cloud data breaches will be inevitable.

SHOULD YOU AVOID THE CLOUD?

Realistically, you can avoid the Cloud at you own peril. The agility and scalability offered by the Cloud gives organizations of all sizes a crucial edge in the market.

Organizations can Go To Market quickly to cash in on the window of opportunity that may otherwise be lost due to the slow implementation of IT infrastructure needed to support your idea.

SO WHAT SHOULD YOU DO?

Security should be an important consideration at every stage of Cloud adoption rather than an afterthought. We recommend a holistic approach to security in the Cloud. Some of the key security aspects you should consider when contemplating Cloud adoption include:

- What is confidentiality level of the data that you plan to move to the Cloud?
- Are there any regulatory mandates that must be considered?
- What Cloud service and deployment model is best suited for your requirements?
- What security features does the Cloud Service Provider offer?
- Does your IT team have necessary Cloud security skills to understand and mitigate Cloud risks?
- Does the SLA offered by the Cloud Service Provider address your concerns?

HOW CONFIDIS CAN HELP

Confidis has been working in the domain of Cloud security for a long time. Our team has been involved in:
- Creating the Certificate of Cloud Security Knowledge (CCSK) launched by Cloud Security Alliance (CSA)
- Creating the Cloud Controls Matrix launched by CSA
- Creating the Certified Cloud Security Professional (CCSP) certification launched by CSA and ISC2
- Co-authoring the book "Practical Guide to Cloud Computing" launched by Cloud Standards Customer Council

We can help you adopt GLOBAL CLOUD SECURITY GOOD PRACTICES at all stages of your Cloud journey. Our services include: TRAINING, CONSULTING & IMPLEMENTATION
